

Hengfu Announces the new 240W Single Output DIN Rail Series

Shanghai, China, Hengfu announced the release of the latest addition to their 5000 model line card, a state of the art 240 watt Din Rail power supply.

This new 240 watt Din Rail supply has a superior performance when compared to some of the other competitors in the market.

The new HF-240W-SDR Din Rail supplies have a universal input range from 85VAC to 264VAC. Each unit is fitted with OCP indication and has high reliability and a compact design.

The units has overload, over voltage, over temperature and short circuit protection. With its industry leading 5 years limited warranty, it is one of the best supplies available on the market for control systems and instrumentation applications.

The HF-240W-SDR is available in a 24 Volt @ 10 Amp and 48 Volt @ 5 Amp models. This versatile supply has a PF greater than 0.94 at 230V. The units operates at a temperature range of -20 to +50°C and is fitted with 3P/ 7.5mm pitch 4P/ 5.0mm pitch, plug-in terminal block for easy connection.

Hengfu Corporation is recognised as the leading manufacturer of switching supplies in China. Hengfu only uses the highest grade electronic components and implement state of the art high speed AI machines, pick and place machines, ATE, ICT and RoHS testing, Environmental testing, EMC testing systems, burn-in test rooms, data acquisition, ect. Each unit is given full load burn-in test to ensure the best possible quality of product.
